

Hangar Rat

Spillway Radio Control Club, Inc.

AMA Chapter 979

Founded 1972

Sometimes life becomes a challenge. We fight foreign enemies or persevere natural disasters. Now we must face the near total destruction of a vibrant community. Only in the months ahead will we write the stories of triumph over adversity. Now we can only look in disbelief at the suffering.

A recreational activity pales in importance to these events, yet in our recreation we have the chance to meet some good people who share our interests. Ours is a unique gathering of backgrounds and experience, but our shared interests have brought us together to laugh and play. My life is richer for getting to know each of you.

As your club secretary I've enjoyed this association. I hope we will be together soon. I am presently in Georgia awaiting good news. I hope Norco was spared, but I know there are members who live in the areas hardest hit – myself included. Our thoughts and prayers are with them.

I can only send this issue of the "Rat" via e-mail. My printer is still submerged. Please pass this along to those members who don't have e-mail. Take care everyone. We'll see you on a sunny day at the field.
