**Officers:** President: Gus Praesel 331-9328  
 Vice-president: David Breaux 467-5136  
 Treasurer: Loren Bailey 738-1602  
 Secretary: Tina Praesel 331-9328

### NEXT MEETING:

The next meeting of the Spillway Radio Control Club will be September 9, 1999 at 7:30 PM at the O.C.A.W. Union Hall in Norco. Hope to see you there.

### OLD BUSINESS:

Eighteen members and one visitor attended and the August meeting.

The minutes and the treasury report were read and accepted by members present.

Loren B told us that William Respass mowed when because of rain the man who was suppose to mow could not. He even made several trips to accomplish it.

### THANK YOU!

### FUEL:

Fuel is in and we need to pick up fuel so we don't leave it in Darrel's shop any longer than is necessary. Darrel will bring fuel to the meeting if you call him but you must pick it up that night. It would not be right if he goes to all that trouble and we don't pick it up.

Jon S gave us an update on our fun fly coming up. He had a chart with all his presentation to show us just how it will come together.

He estimated that our field would handle 30 airplanes without much trouble. The front parking would be reserved for pilots. The grass has been mowed down the sides of the road plus at that time of the year the grass will have slowed down making for good parking.

We will need 5 people to run the event:

- 1 contest director---Jon S
- 4 safety people to rotate---volunteers needed

It was voted on that the date of fun fly would be October 24<sup>th</sup>. For fix wing airplanes only. There will be a \$5.00 landing fee.

Suggested starting times where:

- 9:00 A.M.---sign up
- 9:30--12:00 ---starting and competition
- 12:00--1:00 --- break
- 1:00 -- 3:00 --- competition and ending
- 3:00 -- till when ever open free flying

The first place prize will be a Great Planes Giles kit. Possibly there will be a raffle for another airplane kit. Jon is also looking into a port-a-potty for the families.

Some of the possible events are:

- Spot landing – 3 attempts
- Obstacle course
- Limbo
- Precision flying
- Slowest landing
- Climb and glide

ANY SUGGESTIONS??????

The last chance for your input is the September meeting so be there and help finish our plans.

---

**NEW BUSINESS:**

We met prospective member, Ed Canran from LaPlace.  
Come meet him at the next meeting.

---

**M.O.M.**

**Winner!! Dennis Hymel!!**

Cap.232 Great Planes

40 Size

O.S. 61 2- stroke

Jon S.

Stealth UAV, Jon calls it "The Bubba"

3 – D Flight (wingless)

Made of white foam coated with a fiberglass skin.

Hollow center, 2 – channel, J.R. servos, split elevators

Motor:

Aveox Brushless 3 – phase with on-board micro-processor.

Uses 20-cell battery pack, produces 8 lbs. of thrust.

Travels at 150 to 180 m.p.h.

Andre G.

Spirit 100 SailPlane

100 inch wingspan

3 lbs.

will add servo in the future for tow cable release.

David L.

Laser 200

74inch wingspan

powered by 150 Saito

15-10 or 14-10 prop

Flies with Authority!

---
