Officers: President: Gus Praesel 331-9328
 Vice-president: Jon Stephenson 651- 2930
 Treasurer: Loren Bailey 738-1602
 Secretary: Tina Praesel 331-9328

NEXT MEETING:

The next meeting of the Spillway Radio Control Club will be February 10, 2000 at 7:30 PM at the O.C.A.W. Union Hall in Norco. Hope to see you there.

OLD BUSINESS:

Twenty-three members attended the January meeting.

In a discussion about the grass cutting Garland suggested that we get a firm amount we would pay for our grass cutting dues so we could pay for them.

Gus reminded us that we had voted that since the club had a large balance in our account that it would pay the difference.

Jon will talk to the grass cutter to make sure of what he will charge extra to cut both ends every other week so it won't get so high.

Gary brought up that it would be good if we could grass seed soon and more often than we do. So we would have a better stand of grass to land on. It was pointed out that there is very little grass on the field right now so that we will need to get the grass seed that Sidney has and be ready to seed, fertilize and do mole cricket control soon.

We talked about how we enjoyed the last Fun Fly and will try for another about May. Jon said that we had one he would help organize it again.

The sign if you are not aware of it is shot to pieces so we have been talking about what we could do about it. One suggestion was from Gary that we put the sign at an angle like the parks do and high enough that they would be uncomfortable to try and shoot it. The motion was made that we put the rules on the back of the big heavy name sign, which took the shots well, and a long pipe with angle iron on it for the numbers because it would be hard to hit when shot at. It was voted in to do it this way till who ever gets tired of shooting at the signs.

FUEL:

Lets remember if we need to get fuel to talk to Darrell and help relieve him of the burden. Darrell will be bringing fuel to the meeting if you ask. You can call him at this business 466-2982 or home 486-1875 if you need fuel.

NEW BUSINESS:

Jon told us about a strong evening interference that seems to cover all channels. Seems to be all weekdays In the evening. SO BE CAREFUL if you fly during the week in the evening.

Jon also showed us pictures of how the dog people where parking up against our back fence making it impossible to fly. However Jon after asking them to move and they refused, went to the ranger. The ranger did get them to move so if you have any problems with anyone remember we have a ranger now to help us work out problems at the field.

M.O.M.

Rickt Lanser won with his Four Star 60. His first plane to build. It took him from July to January to finish the plane. It was covered in blue and white and the engine was a YS91. They had run some fuel through it on a test stand but it had not flown yet. It sported a four blade prop so it should really take off.

Dale Dutt was cleaning out his building closet and instead of throughing his extras away gave us a chance to use them. Thank You Dale.

You never know what your going to miss when you don't come.
