Next Meeting:

The next meeting of the Spillway Radio Control Club will be Thursday, April 9th at 7:30 PM. at the St. Charles public library.

Minutes:

Bret Perilloux called the meeting to order at 7:36pm. Loren read the treasure's report which stated that the club currently has \$5413.91 in the bank.

Old Business – The tentative date for the fun fly was April 11 2009. The discussion was whether or not to have it or postpone it since this is Easter weekend and participation may be low. A decision was made to move the date to the weekend after, the new date will be April 18th, 2009. Start time to be announced at the next meeting. Discussion went on about what goes on for this, how many volunteers are needed and participants. Skip Jacob asked what kind of events will be and there was plenty of talk about it but nothing is final yet. Bring your suggestions and ideas to the next meeting.

New Business – Lauren is submitting the AMA recharger this weekend, most of the club renewed membership but there are still some members that haven't paid the club dues and or renewed the AMA dues yet. Current AMA membership is required to be a club member. Since both dues and AMA membership must be paid all members that haven't paid both will be dropped from the roster. Reinstatement will be considered if all dues and membership fees are paid in a timely manner.

Skip read a thank you card from Susie Melancon for the clubs presence at Wayne Melancon's funeral.

Barry Bleakly mentioned that the grass cutting day will still be on Thursday weather permitting, with Friday being a backup day. Grass cutting has priority to flying so please respect the grass cutters when they arrive at the field by not trying to use the field for the time it will take for the grass to be cut.

Congratulations to Todd Rojas and Jerry Fullerton who were voted in at the last meeting.

Skip Jacobs presented Harry Norvell with his solo certificate.

Chris Barrett was introduced as a new applicant.

Model of the Month: Lauren Bailey showed his kit built 89inch wingspan 1.20 ASP powered PT 19. This plane had plenty of scale details and even a moving pilot!
